

Action items of Konstantin Beznosov

- Action item: “Write up on not allowing administrators to provide a list of evaluators with two or more evaluators having the same name.”

To add the following sentences to the paragraph titled “get_policy_decision_evaluators()” in section “PolicyEvaluatorLocator interface “on page 28:

“Administrators of a PolicyEvaluatorLocator shall insure that a an instance of PolicyEvaluatorList returned by get_policy_evalautors() does not contain elements that have same value of evalautor_name.”

- Action item: “Write a section in HRAC spec on how the submission addresses the requirement on healthcare resource names.”

Replace text of paragraph titled “A set of Healthcare specific secured resources” in section “MANDATORY RFP REQUIREMENTS” with the following:

“The submission provides changes to Person Identification Service specification. The changes define what resource names should be used by PIDS-compliant services if such services choose to use HRAC Section 4 of the submission contains changes to PIDS specification.

The submission team worked with the submitters of the upcoming specification of Clinical Observation Access Service on defining what resource names should be used by COAS-compliant services if such services choose to use HRAC.

The submission team believes that all future RFPs recommended by Healthcare DTF should contain a mandatory requirement. The requirement should ask submissions to specify what HRAC resource names will be used by compliant implementations if they choose to use HRAC-compliant services.”
